**see separate sheet**

**Box No. VII Certain defects in the international application**

---

The following defects in the form or contents of the international application have been noted:

**see separate sheet**

**Re Item V.**

- 1 Reference is made to the following document:  
D1 : US 6 209 508 B1 (TINNEY JOSEPH F) 3 April 2001 (2001-04-03)

**2 INDEPENDENT CLAIM 1**

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document):

- a diesel engine comprising:
  - a fuel supply passage (16) via which fuel is supplied from a fuel tank (12) to an oil pan (22) through a supply pump (24);
  - a lubrication-system (18) fuel supply passage via which fuel is supplied from the oil pan to engine parts to be lubricated through a lubricating oil pump; and
  - an injection-system fuel supply passage (26) via which fuel is supplied from the oil pan to an injection system (27) through an injection pump (29)

As the document D1 shows all the features of the first claim, the subject-matter of this claim is therefore not new .

**Re Item VII.**

**Certain defects in the international application**

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D1 is not mentioned in the description, nor is this document identified therein.

Independent claim 1 is not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in the preamble (Rule 6.3(b)(I) PCT) and with the remaining features being included in the characterising part (Rule

6.3(b)(ii) PCT).

The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
